## Education

|                                                                                                                                       |                                          |
|---------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|
| <b>Mahindra University, School of Engineering</b><br><i>Bachelor of Technology in Computer Science and Engineering; CGPA: 7.96/10</i> | Hyderabad, India<br>Aug 2023 – Present   |
| <b>HMR International</b><br><i>Intermediate Education (PCM); Percentage: 80%</i>                                                      | Bengaluru, India<br>June 2020 – May 2022 |
| <b>Narayana Olympiad School (CBSE)</b><br><i>10th Grade Secondary School Certificate; Percentage: 91.2%</i>                           | Bengaluru, India<br>May 2019 – June 2020 |

## Technical Skills

**Programming Languages:** Python (Primary), C++, SQL, MATLAB  
**Machine Learning & Deep Learning:** PyTorch, TensorFlow, Keras, Scikit-Learn, NumPy, Pandas, LSTM, GRU  
**Software Engineering & Tools:** FastAPI, React, Docker, Git, REST APIs, JSON  
**Mathematical Foundations:** Probability, Statistics, Optimization, Time Series Analysis, Reinforcement Learning (Q-Learning)

## Technical Projects

**Asset Price Prediction Platform** Jan 2026 – Present  
*Developer; Stack: FastAPI, React, PyTorch, Statsmodels* [github.com/VenkataVinesh/Asset-Price-Prediction-Platform](https://github.com/VenkataVinesh/Asset-Price-Prediction-Platform)

- Built an interactive forecasting platform to evaluate how sequential deep learning models (LSTMs) compare with classical statistical baselines (ARIMA) on noisy pricing data.
- Created data pipelines to calculate 14-day rolling technical features (SMA, EMA, RSI, and Volatility indicators) in Pandas.
- Developed a FastAPI backend to run model inference and serve real-time predictions to a responsive React dashboard.
- Integrated interactive chart visualizations displaying historical asset prices against projected multi-step forecast intervals.

**Weather Forecasting Analytics** June 2025 – July 2025  
*ML Developer; Stack: Python, Pandas, Statsmodels, PyTorch* [github.com/VenkataVinesh/Weather-Forecasting-Analytics](https://github.com/VenkataVinesh/Weather-Forecasting-Analytics)

- Analyzed multi-dimensional meteorological sensors, implementing ARIMA, SARIMA, and PyTorch LSTM networks to forecast temperature and humidity.
- Conducted time-series decomposition to isolate trend and seasonal patterns, adjusting model hyperparameters based on residual stationarity checks.
- Compared sequence network architectures against statistical baselines, documenting computational latency and forecasting accuracy trade-offs.

**Machine Learning Predictive Models** June 2025 – July 2025  
*ML Developer; Stack: Python, Scikit-Learn, Pandas* [github.com/VenkataVinesh/Machine-Learning-Predictivity](https://github.com/VenkataVinesh/Machine-Learning-Predictivity)

- Implemented classification and regression baselines in Scikit-Learn to analyze tabular engineering datasets.
- Engineered pipelines incorporating feature selection, scaling, categorical encoding, and cross-validated grid search tuning.

## Certifications

**Deep Learning Specialization** (Coursera) – Comprehensive training in Neural Networks, Backpropagation, CNNs, and RNNs/LSTMs using TensorFlow.

## Leadership & Extra-Curriculars

**Math Club, Mahindra University** Hyderabad, India  
*Logistics Head* Aug 2024 – Present

- Organized logistics and scheduling for university math modeling competitions, academic events, and problem-solving seminars.
- Coordinated resource management, venue setup, and schedules across departments to support academic activities.

**TEDx Mahindra University** Hyderabad, India  
*On-Ground Operations Lead* Jan 2024 – May 2024

- Coordinated on-ground event operations, venue setup, and logistical coordination for speakers and over 500 attendees.
- Managed event flows, speaker timelines, and coordinated team communication for event execution.

**Smart India Hackathon (SIH)** National Level Competition  
*Participant & Team Developer* Sept 2024 – Oct 2024

- Collaborated in a team of 6 to prototype an intelligent system solution, assisting in solution ideation and backend API prototyping.
