Education

Mahindra University, School of Engineering <i>Bachelor of Technology in Computer Science and Engineering; CGPA: 7.96/10</i>	Hyderabad, India Aug 2023 – Present
HMR International <i>Intermediate Education (PCM); Percentage: 80%</i>	Bengaluru, India June 2020 – May 2022
Narayana Olympiad School (CBSE) <i>10th Grade Secondary School Certificate; Percentage: 91.2%</i>	Bengaluru, India May 2019 – June 2020

Technical Skills

Programming Languages: Python (Primary), C++, SQL, MATLAB
Machine Learning & Deep Learning: PyTorch, TensorFlow, Keras, Scikit-Learn, NumPy, Pandas, LSTM, GRU
Software Engineering & Tools: FastAPI, React, Docker, Git, REST APIs, JSON
Mathematical Foundations: Probability, Statistics, Optimization, Time Series Analysis, Reinforcement Learning (Q-Learning)

Technical Projects

Asset Price Prediction Platform Jan 2026 – Present
Lead Developer; Stack: FastAPI, React, PyTorch, Statsmodels, Tailwind CSS github.com/VenkataVinesh/Asset-Price-Prediction-Platform

- Engineered a web application for time series price forecasting combining deep learning (LSTM) and classical statistical (ARIMA) models.
- Implemented feature engineering pipelines in Python to calculate rolling technical indicators (SMA, EMA, RSI, and Volatility metrics).
- Developed asynchronous REST APIs in FastAPI to run model inference and serve predictions to a responsive React frontend dashboard.
- Integrated interactive chart visualizations displaying historical asset prices against projected multi-step forecast intervals.

Weather Forecasting Analytics June 2025 – July 2025
ML Engineer; Stack: Python, Pandas, Statsmodels, Matplotlib github.com/VenkataVinesh/Weather-Forecasting-Analytics

- Built statistical forecasting models (ARIMA and SARIMA) to predict hourly meteorological variables (temperature, humidity).
- Conducted time-series decomposition to analyze trend, seasonality, and noise, optimizing hyperparameters using AIC/BIC criteria.
- Compared LSTM neural network architectures against classical baselines, documenting trade-offs in computational latency and accuracy.

Machine Learning Predictive Models June 2025 – July 2025
ML Developer; Stack: Python, Scikit-Learn, Pandas github.com/VenkataVinesh/Machine-Learning-Predictivity

- Developed regression and classification models using Scikit-Learn to solve tabular predictive analytics tasks.
- Performed feature selection, handling missing values, scaling features, and encoding categorical variables.

Certifications

Deep Learning Specialization (Coursera) – Comprehensive training in Neural Networks, Backpropagation, CNNs, and RNNs/LSTMs using TensorFlow.

Leadership & Extra-Curriculars

Math Club, Mahindra University Hyderabad, India
Logistics Head Aug 2024 – Present

- Led operational planning and logistics coordination for mathematics competitions, academic events, and problem-solving seminars.
- Organized technical activities for student bodies, optimizing resources and schedules to ensure smooth venue coordination.

TEDx Mahindra University Hyderabad, India
On-Ground Operations Lead Jan 2024 – May 2024

- Coordinated on-ground logistics, venue setup, and audio-visual setups for regional speakers and over 500 attendees.
- Managed operational flows, event timelines, and cross-functional coordination between stage managers, technical crews, and logistics teams.

Smart India Hackathon (SIH) National Level Competition
Participant & Team Developer Sept 2024 – Oct 2024

- Collaborated in a team of 6 to design and prototype an intelligent system solution addressing a national-level problem statement.
